Summary

Web Developer specializing in full-stack web applications and modern, responsive websites. Combines robust backend architecture—focusing on secure relational databases, and system reliability—with interactive and performance frontend experiences powered by GSAP, Lenis, and Three.js. Dedicated to writing clean, maintainable code that prioritizes end-to-end security, performance optimization, and seamless user engagement.

Experience

Vikrant Novatech Pvt. Ltd.

Nanded City, Pune

Software & Web Development Intern

6 Months | Dec 2025 - Jun 2026

- Developed 8+ responsive web applications and client websites with 90+ Lighthouse performance and accessibility score.
- Built the official VNPL website using ThreeJS and Tailwind CSS, optimizing load times to under 1.5 seconds.
- Engineered secure PHP and MySQL backend systems for ERP and automated billing solutions.
- Performed QA testing, implemented role-based authentication, and optimized API performance by ~20% before deployment.

Education

MES Senior College

BBA & Computer Applications

Expected Graduation : Jun 2026

Prestige Public School & Jr. College

Higher Secondary Education

Completed : Mar 2023

Technical Skills

- **Languages:** JavaScript, Python, PHP, SQL
- **Frontend:** HTML5, CSS3, Tailwind CSS, AngularJS
- **Backend:** Node.js, Express.js, Django, REST APIs
- **Frameworks & Libraries:** GSAP, Lenis, Three.js
- **Database:** MySQL
- **Tools & Platforms:** Git, GitHub, Vercel, Supabase, XAMPP

Projects

Platinum Palace

- Created a high-performance multi-page storefront with secure transaction flows and support for 50+ concurrent users.
- Designed a relational database with 10+ interconnected tables, ensuring data integrity and secure user data handling.
- Deployed applications on Vercel with CI/CD integration and server-side optimizations, achieving sub-1-second load times.

EasyAbode

- Built a property management portal using Node.js, MySQL, and Tailwind CSS with secure JWT-based authentication for tenants and owners.
- Streamlined a RESTful API with 31 secure endpoints, integrating Stripe payments and PDF lease generation with <80ms response times.
- Integrated Socket.io for real-time messaging and Cloudinary for optimized property image storage and delivery.
